AccuDiag™

Total T4 ELISA

Test Background

Thyroxine (T4) is a hormone that is synthesized and stored in the thyroid gland. Measurement of total T4 by immunoassay is the most reliable and convenient screening test available to determine the presence of thyroid disorders in patients.

Intended for the quantitative determination of Total Thyroxine concentration in human serum.

Specifications

Principle	Competitive Immunoassay
Reference Standards	0-30 µg/dL
Sample	25 µL serum
Total Time	~ 80 min
Shelf Life	12 Months from the manufacturing date

Sensitivity:

0.5 µg/dL

Specificity:

96.30%

Advantages:

- Specific and sensitive technology
- High Throughput Screening (HTS) compatible
- CE Marked
- Cost Efficient
